

XM Radio is a dream come true for me. There have only been a few radio stations that I have liked in my lifetime, and most of them don't stay on the air more than a few years. Those stations did not have stupid, idiotic disc jockeys, nor did they play the same songs over and over. They did not have many commercials. I love my XM. I don't mind paying for it monthly to enjoy the benefits. I happen to be a "weather freak" and find the Instant Weather and Traffic channel very informative. Please stop the NAB from taking it away from me.
